

WHEN EVERY DETAIL MATTERS

Since 2016, Capital Air Systems, LLC has served Greater Boston and the New England region, providing expertise and quality workmanship on a wide range of development projects including industrial, commercial, and residential properties. We offer expertise for a wide range of projects including manufacturing plants, warehouses, healthcare facilities, hospitality venues, restaurants, senior housing, and individual commercial and retail spaces. Our team has successfully completed projects with HVAC budgets between \$50,000 and \$3 million in scope for developers, architects, governmental operations, and independent construction firms.

Our commitment to achieving full satisfaction for every client is reached through experienced project management, open communication, valuable expertise, and dedicated service throughout the lifecycle of the project. We provide professional knowledge with breadth and depth to ensure your project has a long-lasting efficient HVAC solution adapted specifically to your unique needs.

OUR APPROACH

Sound analysis of every installation begins with a dedication to detail at all stages of execution from estimation and quotation through delivery, testing, and post-installation service. Our excellent team of qualified, licensed HVAC project managers and technicians work in collaboration with our clients to achieve exceptional results in a cost-effective manner. We recognize that each project is unique and requires solutions which account for structural limitations, environmental outcomes, end-use and budgetary considerations.

We offer prompt and accurate estimates to ensure that your project is completed within the expected cost parameters. Our on-site teams are adept at adapting to development changes as well as analyzing the challenges and impacts of each proposed change and communicating that information to the wider construction team. We pride ourselves on selecting experienced and detail-oriented staff for each on-site technical crew.

As a contracting partner, we understand that communication and prompt response is key to achieving outstanding results on-time and on-budget. We strive to always maintain open communication with our development partners as well as provide more formalized weekly status updates. In addition, we provide dedicated assistance throughout the project lifespan with costing and billing issues.
